

Assignment no. 1.

★ Sample Business Requirements Documents Template:

- Problem:- People's who live's in city, they phase many more problem's of the milk at morning. They do not get fresh & pure milk at morning. For getting fresh & pure milk people's always needs to travel out of city. For making this problem easier we need to make an application or website through which people's can place online order for milk & other ingredients from seller.

1) Executive Summary snapshot:-

- Research has shown that we need to develop an application or website for people's and seller.
- This research data indicates that there are so many people's ~~last~~ (customer's). So we need to make our application on big scale.
- The scope of the proposed project is in a large number in city.
- The main business drivers behind the effort are seller.
- The current process only allows us to make application in one city. accosionly, the proposed process allows us to make application in all city.

2) Project Description:

- While the current process only allows us to make application for one city, the proposed process allows us to make applications for many city.
- The goal of making an application for many city presents the following challenges such as:
 - Seller will take more and more order's from his customer's
 - Seller will deliver his fresh and pure milk and other ingredient to the customer.
- Why we need to take this project?
 - Because, - It will make ~~our~~ people's (customer's) as well as seller life easy.
 - In this city, people's (customer's) are in large number by solving there problem we will get more profit as well as our company become famous in common people.

3) Project Scope:

- Project special Goals: ~~We~~ we need to reach out to peoples by doing our best and give them our best product.
- Tasks = Our task is that we will make an user Friendly app which common people can use without any difficulty.
- The app's Features are the peoples/customer are able to give the order of milk or other ingredient through which seller can give them fresh & pure milk & other ingredient on time.

- We need to discuss with our team and then deliver the work between team members.

- Costs: Approximately we need 50,000 for make single app, in which we need to pay our team member, there are some legal fees & taxes also associated and our companies ultimate goal is to make profit so we will need to look on that also.

- Deadlines - We need to give some deadline by discussing with team members in which we will give our final product (Application). such as, we will provide you app in 3 months.
